

MIDLAND 8001 XT

AM/FM/SSB CB mobile transceiver

Cod. C1003

MIDLAND presents the new version, technologically 'updated' with SMD components, of the renowned AM/FM/SSB transceiver.

MIDLAND 8001 XT is a 40 channel mobile transceiver, of easy and immediate use thanks to its practical controls and indicators, such as example the knob to adjust the microphone gain (MIC GAIN), the modulation selector (AM-FM), the SWR-CAL / RF PWR knob that adjusts the antenna tuning (SWR-CAL) or the RF output power from 1 to 4W in AM/FM (RF PWR).

MIDLAND 8001 XT is the ideal solution for long-distance communications.

In this new version, the radio is supplied with the excellent microphone model Midland MDL4190.

COMPLYING TO CE/99/05

Main features:

- Output power: AM/FM 4W – SSB 12W
- 5 digit frequency meter
- Automatic NB/ANL
